CAREER SUMMARY

CSE graduate with 2+ years of hands-on experience in Intelligent Transportation Systems (ITS), IT infrastructure, system monitoring, network configuration, installation and technical troubleshooting. Experienced in managing VDS, VMS, CCTV, Speed Enforcement Systems, servers, NMS and SolarWinds. Skilled in Cisco networking, VLAN, Inter-VLAN Routing, Static Routing, RIPv2, OSPFv2, EIGRP, EtherChannel (LACP/PAGP), Standard & Extended ACL, SSH, IPv4 addressing, subnetting and network troubleshooting. Strong ability to support system reliability, resolve technical issues, coordinate field activities and prepare technical documentation.

PROFESSIONAL EXPERIENCE

VaaaN Infra Private Limited | Resident Engineer- Installation and Customer Support | May 2024 – Present

Project: Improving the Reliability and Safety of National Highway Corridors in Bangladesh.

- **ITS Infrastructure Management:** Manage and maintain Intelligent Transportation System (ITS) devices at the Traffic Management Centre (TMC), including Vehicle Detection Systems (VDS), Variable Message Signs (VMS), CCTV, and Speed Enforcement Systems.
- **System Monitoring:** Proactively monitor server health and device status using SolarWinds and NMS to ensure real-time operational efficiency and minimize downtime.
- **Maintenance & Troubleshooting:** Diagnose and troubleshoot Traffic Management Center (TMC) servers, hardware and software.
- **Installation & Config:** Execute the installation, network integration, and configuration of new ITS devices to ensure proper connectivity.
- **Data Security:** Manage data backups, log storage, and maintain comprehensive documentation of system activities.
- **Operational Reporting & Resource Management:** Generated detailed technical reports on road incidents and system faults while coordinating with field teams for timely resolution; formulated precise material and cost estimations, and managed procurement requisitions to ensure uninterrupted field workflows and resource availability.

TECHNICAL SKILLS

Networking: Cisco Router & Switch Configuration; VLAN & Inter-VLAN Routing, Static Routing, Dynamic Routing: RIPv2, OSPFv2, EIGRP, EtherChannel: LACP & PAGP, Access Control Lists: Standard ACL & Extended ACL, SSH Remote Access, IPv4 Addressing & Subnetting, LAN/WAN Configuration, Network Connectivity & Troubleshooting.

IT Infrastructure: ITS Device Installation & Maintenance: (VDS, VMS, CCTV, Speed Camera), Server, Hardware & Software Troubleshooting, NMS, SolarWinds.

Programming & Web: C, Python, HTML5 & CSS3.

Tools: Cisco Packet Tracer, Git, GitHub, Microsoft Word, Excel & PowerPoint, Google Docs & Sheets.

NETWORKING – HANDS-ON PRACTICE

- Configured **SSH remote access** on Cisco routers and switches.
- Created and configured **VLANs** and implemented **Inter-VLAN Routing**.
- Configured **Static Routing** between multiple networks.
- Implemented **Dynamic Routing protocols including RIPv2, OSPFv2 and EIGRP** in multi-router network topologies.
- Configured and tested **EtherChannel using LACP and PAGP** for link aggregation and redundancy.
- Configured **Standard ACL and Extended ACL** to control and filter network traffic.
- Troubleshoot routing, VLAN, trunking, connectivity and access-control issues in Cisco network environments.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science & Engineering

Daffodil International University (DIU) | Passing Year: 2024 | CGPA: 3.40 / 4.00

Higher Secondary Certificate (HSC)

Bhola Government College | Science | Passing Year: 2019 | GPA: 4.75 / 5.00

Secondary School Certificate (SSC)

Bhola Abdur Rob High School and College | Science | Passing Year: 2017 | GPA: 5.00 / 5.00

CERTIFICATIONS & TRAINING

- CCNA Training – E-Learning & Earning Institute
- ITS O&M Certification – Operation & Maintenance of Intelligent Transport Systems, KOICA, South Korea

RESEARCH & THESIS

Enhancing Network Intrusion Detection System

- Developed a machine learning-based model to detect network anomalies and security threats using the CICIDS-2017 benchmark dataset.
- Analyzed network traffic patterns to evaluate the effectiveness of different machine learning methods for intrusion detection.
